

Roman Resenchuk

Senior iOS/macOS & Agentic AI Developer

+1(484)306-35-72 • Remote (Worldwide) • r@resrom.com • [Portfolio](#) • [GitHub](#)

iOS and macOS developer and agentic AI developer, building for Apple platforms since 2011. I build native Swift and SwiftUI apps with on-device AI, plus agent harnesses, autonomous agents and MCP integrations. Led iOS teams of up to 6 developers, architected modular apps, set up CI/CD, and launched and maintained 100+ iOS apps, including 30+ white-label apps.

EXPERIENCE

Senior iOS Developer, X-Checkers & X-Chess

Sep 2024 – Aug 2025, Austin, TX, United States

Developed from scratch an iOS app for chess and checkers with social network and learning features.

Stack: Swift 6, SwiftUI, MVVM, Concurrency, Combine, Firebase, WebSocket, REST API, RevenueCat, StoreKit 2, Stockfish

- Built a stable, scalable client-server architecture with online games, bots (backend and local Stockfish engine) and social features (friends, chats, leaderboards).
- Implemented the online game module: fast matchmaking, PvP, ratings, gameplay customization, animations and gestures.
- Configured CI/CD, analytics (events and documentation generated with bash scripts), crash reports with custom logging, subscriptions (In-App, webhooks).

iOS apps: X-Chess, X-Checkers [x-chess.app](#)

Lead iOS Developer, 585 Gold

Oct 2023 – Oct 2024, Remote

Led a team of up to 6 iOS developers (middle to senior); stable releases and 100% on-time task completion.

Stack: Swift, SwiftUI, MVVM, Combine, Alamofire, Core Data, StoreKit, PassKit, Firebase, Fastlane, OpenAPI

- Migrated the project from mixed architectures (MVC, MVVM, MVI, RxSwift, VIPER) to SwiftUI + MVVM+C.
- Refactored the monolithic codebase into feature-based modules with shared layers.
- Maintained CI with Fastlane; integrated Jira, Mattermost and App Store Connect.
- Built new modules (stories, cart, loyalty program, payment provider change) and refactored legacy ones (auth, favorites, catalog, product card); introduced OpenAPI and DTO generation.
- Set up the code review process and a unified code style; took part in business planning.

iOS app: 585 Gold jewelry store [App Store](#)

Lead iOS Developer, ONDOC

Mar 2022 – Oct 2023, Yerevan, Armenia

Medical app with an electronic medical card and telemedicine; white-label iOS apps for clinic appointments.

Stack: Objective-C, Swift, UIKit, SwiftUI, Alamofire, HealthKit, UserNotifications, WebRTC, PassKit

- Managed a small team of iOS developers; architectural design and legacy code and UI refactoring.
- Set up CI/CD (Fastlane, TeamCity, Xcode Cloud, Firebase); fixed critical bugs, improved build and app performance.
- Regular App Store releases and successful dispute resolutions with Apple.

Launched and maintained 30+ white-label iOS apps, including Ondoc [App Store](#), European Medical Center [App Store](#), Capital-Polis [App Store](#)

Senior iOS Developer, Tapcentive, Inc.

Jul 2019 – Jul 2021, San Francisco, CA, United States

NFC and chip-card iOS applications.

Stack: Swift, UIKit, MVVM, CoreNFC, low-level data handling, Core Animation

iPad app: Smart Chip Gaming, a hardware-integrated, secure gaming solution for offline venues (casinos, cruise liners).

iPhone app: SmartScratch Helper, instant NFC lotteries [App Store](#)

Middle iOS Developer, Flyp, Inc.

Mar 2017 – Jul 2019, Dallas, TX, United States

New features and stability for multiple iOS apps; white-label apps on a shared codebase.

Stack: Objective-C, Swift, UIKit, Alamofire, CallKit, PushKit, WebRTC, In-App Purchase
iOS apps: Flyp - Multiple Phone Numbers, Solo Calling, Flex Calling

Middle iOS Developer, Ready for Sky LLP

Oct 2014 – Oct 2015, Singapore

Smart Home REDMOND (Ready For Sky, IoT) iOS app: development and maintenance, architecture for scalability, technical documentation.

Stack: Objective-C, Swift, UIKit, REST API, CoreBluetooth, Core Data

iOS app: Sky smart devices and services [App Store](#)

Junior iOS Developer, FRESHOFFICE

Oct 2011 – Oct 2014, Singapore

FreshOffice CRM iOS app.

Stack: Objective-C, UIKit, AFNetworking

EDUCATION

ITMO University, Information Technology

ACTIVITIES

Attended Apple WWDC 2018 and 2019. Local iOS meetups and workshops. Mentored junior iOS developers at work. Personal apps end to end: design, development, UI/UX and ASO; made one profitable and sold it.

CORE SKILLS

iOS and macOS development | Swift, SwiftUI, UIKit, AppKit, Concurrency, Objective-C | MVVM, VIPER, SOLID, modular architecture | CI/CD, Fastlane | Agentic AI: agent harnesses, autonomous agents, multi-agent orchestration, MCP | Claude Code, Codex | Team leadership, Agile, Jira
